RIGGING EQUIPMENT

Beyond Integration
Seamless Solutions™

Rigging/Crane Blocks & Swivels

At Ansell Jones we have been designing and manufacturing rigging blocks for over 50 years. Over this time our designs have evolved to meet and exceed stringent safety regulations and the needs of our diverse customer base.

Our engineering knowledge and ability to adapt our products to our client's exact requirements has enabled us to develop a product range suitable for use in a huge variety of applications. We supply all industry sectors from the construction and recovery industry to oil and gas processing facilities.

Rigging blocks are manufactured from different materials depending on the operating environment, material certification and load capacity required.

Our rigging blocks are available with a choice of head fittings and sheave sizes to suit your wire rope size. All our blocks are manufactured in the UK and are 100% tested and certified.

Features

- All blocks are manufactured in the UK and are 100% tested and certified;
- Available with a choice of head fittings, hook types and sheave sizes to suit a variety of wire rope diameters and applications;
- Manufactured from different materials depending on operating environment, material certification and load capacity required;
- Refurbishment and upgrade of existing crane blocks and swivels undertaken;
- Many cranes utilise Ansell Jones blocks and swivels in operation across the world today.

We manufacture a range of cast, machined and fabricated sheaves for a wide variety of applications. Sheaves can be supplied on their own or supplied complete with fabricated housings suitable for welding or bolting to your structure.

All are designed and manufactured to our customers' particular requirements. They can range from 75mm to over 2 metres in diameter and can be manufactured with lightening holes to reduce overall weight without compromising strength.

Sheaves can also be custom made for working offshore where low temperature operating conditions are an important factor and are supplied fully certified to 3.1 or 3.2 levels of traceability.

All are painted to a full offshore paint specification as standard. They can also be painted to suit your own required paint specification.

We are also highly experienced in working in conjunction with third parties including DNV, Lloyds, API and ABS.

Features

- Cast, machined or fabricated depending on quantity and applications;
- Designed in accordance with 3rd party certifying authority rules;
- Suitable bearing selected for operating environment and maintenance schedule;
- Rope grooves can be hardened for longer service life;
- Packages supplied for complete mooring, diving, A&R systems;
- Can be supplied with calibrated load cells, encoders and readouts.
